

## CompTIA Security+ Continuing Education (CE) Program

**Meet your CompTIA Security+ certification renewal requirements with this all-inclusive and convenient continuing education program.**

CompTIA Security+ certifications achieved on or after January 1, 2011, are valid for three years from the date issued. Therefore, to remain certified, you must renew within three years of your certification date. Doing so helps you continuously develop IT security skills and keeps your expertise up-to-date.

You can renew your Security+ credential in two ways:

- Option 1: Pass the most current CompTIA Security+ exam prior to the three-year expiration date
- Option 2: Earn 50 continuing education units (CEUs) per renewal period by participating in qualified activities

To help you satisfy Option 2, we created our CompTIA Security+ Continuing Education (CE) Program. This convenient, all-inclusive program includes:

- Around-the-clock access to qualifying CE activities to meet your renewal requirement
- Payment of your CompTIA annual maintenance fees for the full three years
- Convenient tracking of your CE activities

With one-year access to this program of security-related web seminars and self-paced e-Learning, you can easily meet CompTIA's Security+ 50-CEU requirement. We will regularly add material on the latest security topics.

### What You'll Learn

- Business continuity and disaster recovery
- Cloud computing security
- Cryptography
- Ethical hacking
- Incident management
- IT governance
- Risk management
- Securing communications

### Who Needs to Attend

CompTIA Security+ certified professionals who want to remain current

### Prerequisites

CompTIA Security+ certification earned on or after January 1, 2011

### Follow-On Courses

There are no follow-ons for this course.

### Certification Programs and Certificate Tracks

This course is part of the following programs or tracks:

- [CompTIA Security+ Certification](#)

### Course Outline

Earn 50 qualifying CEUs from web seminars and self paced e-Learning.

### Web Seminars

Each web seminar represents 1 CEU.

1. 10 Security Concerns for Cloud Computing
2. Physical Security
3. How to Avoid a Cyber Disaster
4. Protecting Your Network with Authentication and Cryptography
5. Securing Communications
6. Cloud Computing Security
7. Cybersecurity Necessities: A Firewall, Antivirus, and a Well-Trained Workforce
8. Hacking Back in Self-Defense

### **Self-Paced e-Learning**

The number of CEUs for each self-paced e-Learning topic varies based on the hours of content for each topic.

1. Access Control
2. Telecommunications and Network Security
3. Information Security (IS) Governance and Risk Management
4. Software Development Security
5. Cryptography
6. Security Operations
7. Business Continuity and Disaster Recovery Planning
8. Legal, Regulations, Investigations, and Compliance
9. Physical Security
10. Information Security Governance
11. Information Risk Management
12. IS Program Development
13. IS Program Management
14. Incident Management and Response
15. Auditing Information Systems
16. Governance and Management of IT
17. IS Acquisition, Development, and Implementation
18. IS Operations, Development, and Implementation
19. Malicious Code
20. Monitoring and Analysis
