

Red Hat® CloudForms Hybrid Cloud Management (CL220)

In this course, you will learn to perform an initial configuration and setup of Red Hat CloudForms, implement auditing and compliance policies, provision virtual machines (VMs), and produce various reports.

What You'll Learn

- Perform initial configuration of CloudForms Appliance
- Deploy VMs
- Perform VM audits
- Perform policy-based management
- Run VM reports

Who Needs to Attend

- IT professionals with Red Hat Certified System Administrator (RHCSA)-level skills
- System and VM administrators seeking to manage and deploy systems in hybrid cloud environments
- System and VM administrators who already have a cloud deployment seeking to simplify management

Prerequisites

- Red Hat Certified System Administrator (RHCSA) or equivalent system administration skills
- Knowledge of Red Hat Enterprise Virtualization, vSphere, or Amazon EC2 is helpful, but not required

Follow-On Courses

There are no follow-ons for this course.

Course Outline

1. Architecture overview
2. Initial setup
3. Configuration
4. Provisioning
5. Policy-based administration
6. Reporting

Note: Outline is subject to change with technology advances and as the nature of the underlying job evolves.
