

Red Hat® Certificate of Expertise in Hybrid Cloud Storage Exam (CL236)

The performance-based Red Hat® Certificate of Expertise in Hybrid Cloud Storage Exam (EX236) tests your ability to configure Red Hat Storage Server and clients.

About the Red Hat Certificate of Expertise in Hybrid Cloud Storage:

A Red Hat Certificate of Expertise in Hybrid Cloud Storage is earned when an IT professional demonstrates the ability to implement storage solutions using Red Hat Storage Server and to configure clients to use this storage. To earn this certificate, you must pass the Red Hat Certificate of Expertise in Hybrid Cloud Storage Exam.

Note: Global Knowledge and Red Hat do not guarantee that anyone who takes one or all of the courses in the Red Hat certification program will pass a Red Hat exam. On-the-job experience, in combination with high-quality training, is the best way to build skills and prepare for a Red Hat exam. The exam itself is a hands-on learning experience, and many of those who do not pass on the first try come away with knowledge of what they need to work on to pass the exam on a re-take.

Certification:

- Red Hat Certificate of Expertise in Infrastructure-as-a-Service

Who Needs to Attend

- System administrators, architects, and others who need to demonstrate their skills, knowledge, and ability in using Red Hat Storage Server
- No other certification is required to take this exam, but we recommend Red Hat Certified System Administrator (RHCSA) certification or comparable skills and work experience

Prerequisites

There are no prerequisites for this course.

Follow-On Courses

There are no follow-ons for this course.

Certification Programs and Certificate Tracks

This course is part of the following programs or tracks:

- [RHCA - Red Hat® Certified Architect](#)
- [Red Hat Certificates of Expertise](#)
