

Red Hat® System Administration III (RH254)

Red Hat System Administration III (RH254), related to Red Hat Enterprise Linux 7, is designed for experienced Linux system administrators who hold a Red Hat Certified System Administrator (RHCSA) certification or equivalent skills and who want to broaden their ability to administer Linux systems at an enterprise level.

The course is focused on deploying and managing network servers running caching Domain Name Service (DNS), MariaDB, Apache HTTPD, Postfix SMTP nullclients, network file sharing with Network File System (NFS) and Server Message Block (SMB), iSCSI initiators and targets, advanced networking and firewall configurations, and using Bash shell scripting to help automate, configure, and troubleshoot the system.

Through lectures and hands-on labs, RHCSA-certified professionals will be exposed to all competencies covered by the Red Hat Certified Engineer (RHCE) exam.

Note: This course does not cover all RHCSA tasks. Students who need a review of RHCSA skills are encouraged to attend RHCSA Rapid Track Course (RH199).

What You'll Learn

- Network port security and link aggregation
- iSCSI initiator and target configuration
- DNS troubleshooting and caching name server
- Provisioning NFS and SMB file servers
- Apache HTTPD web server management
- MariaDB SQL database configuration
- Postfix SMTP nullclient for servers
- Bash scripting for automation

Who Needs to Attend

Experienced Linux administrators who have earned RHCSA certification or have equivalent skills and wish to learn enterprise-level automation techniques through scripting, how to deploy and secure network services, and how to manage other key security features of Red Hat Enterprise Linux

Prerequisites

RHCSA certification or equivalent experience (You may confirm that you have the correct skill set required for this course by passing the online pre-assessment quiz at redhat.com/explore/pre-assessment.)

- [RHCSA® Rapid Track Course with Exam \(RH200\)](#)
- [Red Hat® System Administration I \(RH124\)](#)
- [Red Hat® RHCE Certification Lab without exam \(RH299\)](#)
- [Red Hat® RHCE Certification Lab with Exams \(RH300\)](#)

Follow-On Courses

- [Red Hat® Enterprise Deployment and Systems Management \(RH401\)](#)
- [Red Hat® Enterprise Clustering and Storage Management \(RH436\)](#)
- [Red Hat® Server Hardening \(RH413\)](#)
- [Red Hat® OpenStack Administration \(CL210\)](#)

Certification Programs and Certificate Tracks

This course is part of the following programs or tracks:

- [RHCE - Red Hat® Certified Engineer](#)

Course Outline

1. Control Services and Daemons

Review how to manage services and the boot-up process using systemctl.

2. Manage IPv6 Networking

Configure and troubleshoot basic IPv6 networking on Red Hat Enterprise Linux systems.

3. Configure Link Aggregation and Bridging

Configure and troubleshoot advanced network interface functionality, including bonding, teaming, and local software bridges.

4. Control Network Port Security

Permit and reject access to network services using advanced SELinux and firewall filtering techniques.

5. Manage DNS for Servers

Set and verify correct DNS records for systems and configure secure DNS caching.

6. Configure Email Delivery

Relay all email sent by the system to an SMTP gateway for central delivery.

7. Provide Block-Based Storage

Provide and use networked iSCSI block devices as remote disks.

8. Provide File-Based Storage

Provide NFS exports and SMB file shares to specific systems and users.

9. Configure MariaDB Databases

Provide a MariaDB SQL database for use by programs and database administrators.

10. Provide Apache HTTPD Web Service

Configure Apache HTTPD to provide Transport Layer Security (TLS)-enabled websites and virtual hosts.

11. Write Bash Scripts

Write simple shell scripts using Bash.

12. Bash Conditionals and Control Structures

Use Bash conditionals and other control structures to write more sophisticated shell commands and scripts.

13. Configure the Shell Environment

Customize Bash startup and use environment variables, Bash aliases, and Bash functions.

14. Linux Containers Preview

Preview the capabilities of Linux containers, Docker, and other related technologies in Red Hat Enterprise Linux 7.

15. Comprehensive Review

Practice and demonstrate knowledge and skills learned in Red Hat System Administration III.
