

Linux Level 3 - 303 Security (LPI-303)

Duration: 5 Days

Course Code: LPIC-3 303

Overview:

The LPIC-3 certification is the culmination of LPI's multi-level professional certification program. LPIC-3 is designed for the enterprise-level Linux professional and represents the highest level of professional, distribution-neutral Linux certification within the industry. Three separate LPIC-3 specialty certifications are available. Passing any one of the three exams will grant the LPIC-3 certification for that specialty. The LPIC-3 303: Security certification covers the administration of Linux systems enterprise-wide with an emphasis on security.

Target Audience:

IT professionals, and career changers seeking to be internationally recognized as professionals and to explore job opportunities in Linux and Open Source.

Objectives:

- Have necessary skills and experience as outlined in LPIC-3 core exam.
- Design and implement customized solutions to complex automation problems such as multi-site enterprises and heavy-duty Internet sites.
- Initiate projects and work against a budget.
- Supervise assistants and help troubleshoot problems.
- Serve as a consultant to higher management.

Prerequisites:

- The candidate must have an active LPIC-2 certification to receive LPIC-3 certification, but the LPIC-2 and LPIC-3 exams may be taken in any order

Testing and Certification

This course will prepare delegates to write the LPI Linux Essentials Exam 303-100.

Successfully passing this exam will result in the attainment of the LPIC-3 303: Security certification
